YOU SKETCH IT — WE BUILD IT

A DIFFERENT KIND OF LIGHTING COMPANY

Your Vision. Our Craft. A Fraction of the Price.

Designer lighting fixtures retail for **\$1,000 to \$6,000+** per piece. That's the cost of someone else's design, mass-produced and marked up through three layers of distribution.

We do it differently. You bring us the idea — a sketch on a napkin, a photo from a magazine, a fixture you love but can't justify — and we custom-build it for you. Same quality. Same materials. **Your design, not theirs.**

Every fixture is built to order at our factory. No catalog. No inventory. Just your vision, made real.

FACTORY DIRECT

Designer Quality Without the Designer Markup

TWO WAYS TO WORK WITH US

Your Own Original Design

Design a fixture that doesn't exist anywhere else. Sketch your idea — on a napkin, a sketchpad, even a text message — and we'll engineer it, build it, and deliver it. Your clients get true exclusivity: a light that exists in one home and nowhere else on earth.

PERFECT FOR: Custom homes, boutique hotels, signature projects

Inspired by Something You Love

Spotted a stunning fixture in a magazine, a showroom, or a hotel lobby? Send us the photo. We'll use it as a starting point to design and build a custom piece that captures what you love about it — in your choice of materials, scale, and finish. An original fixture, inspired by great design.

PERFECT FOR: Builders who want high-end looks on real budgets

FROM SKETCH TO LIGHT

It Starts with an Idea

A napkin. A sketchpad. A photo torn from a magazine. That's all we need to get started.

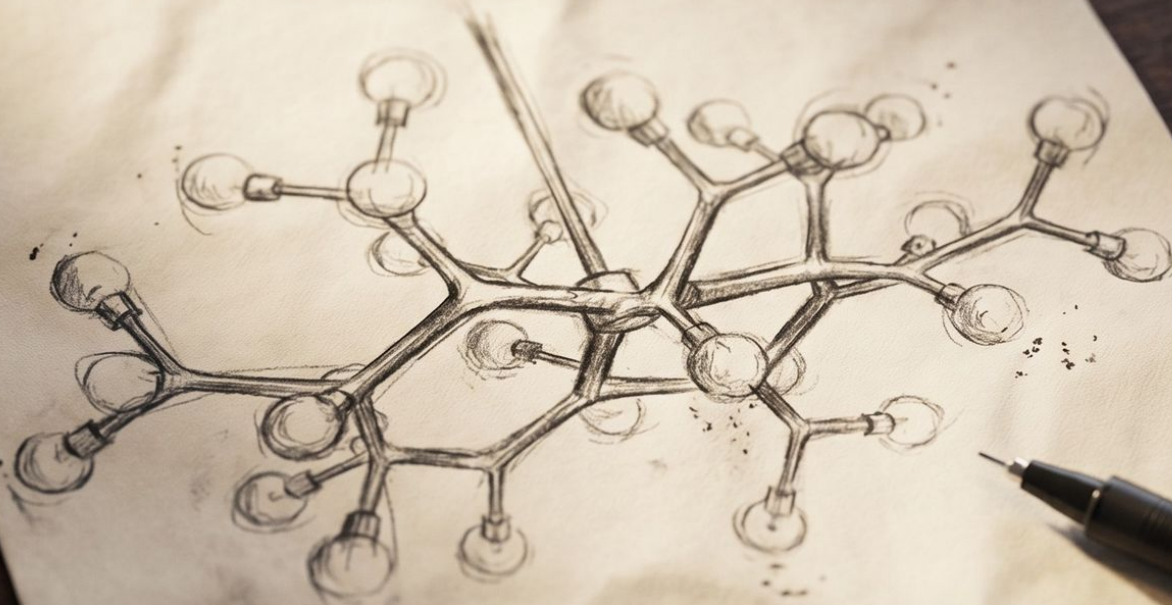

On the following pages, you'll see four fixtures that started as rough drawings. We took the concept, engineered the structure, sourced the materials, and built the finished piece.

Sketches and finished fixtures shown on the following pages.

THE NUMBERS

Designer Fixtures. Real-World Pricing.

High-end lighting retailers charge for the brand name, the showroom, and the distribution chain. We cut all of that out. You pay for materials and craftsmanship — nothing else.

Whether you're designing from scratch or replicating a fixture you've seen, our pricing typically comes in at **40–60% below retail** for comparable quality.

For builders doing multiple homes, the savings compound fast. Ten fixtures per home, five homes in a development — that's real money back in the budget.

Examples shown are representative. Actual pricing depends on materials, complexity, and quantity.

WHAT THE SAVINGS LOOK LIKE

Real Examples

Molecular Brass Chandelier

28-light branching chandelier in brushed brass with hand-blown glass globes. 60" diameter.

~~\$6,800~~ → **\$2,900** **SAVE 57%**

Glass Pendant Cluster

5-pendant organic blown glass cluster on matte black rectangular canopy. Adjustable drop.

~~\$3,200~~ → **\$1,400** **SAVE 56%**

Industrial Linear Chandelier

72" rectangular iron-and-glass cage with 8 Edison sockets. Dual rod suspension.

~~\$3,450~~ → **\$1,550** **SAVE 55%**

Brass Globe Sconce Pair

Pair of brushed brass wall sconces with opal glass globes. Rectangular backplate.

~~\$750~~ → **\$375** **SAVE 50%**

HOW IT WORKS

From Idea to Installation

The process is simple. You don't need technical drawings or engineering specs — just an idea.

STEP 1 — SHARE YOUR VISION

Send us a sketch, a photo, a magazine clipping, or even a description. We'll understand what you're after.

STEP 2 — WE ENGINEER & QUOTE

We study the design, select materials, and send you a detailed quote with a rendering of the finished piece.

STEP 3 — APPROVE & DEPOSIT

Once you approve the design and price, a deposit locks in your order and starts production.

STEP 4 — FABRICATION

Your fixture is built by hand at our factory. Typical lead time is 8–12 weeks depending on complexity.

STEP 5 — PICKUP

Finished fixtures are carefully packed and ready for pickup at our Texas warehouse.
