Custom Designer *Lighting*

You sketch it. We build it.

A DIFFERENT KIND OF LIGHTING SUPPLIER

Your idea, *built for less.*

A designer fixture carries the cost of the brand, the showroom and several layers of distribution. We skip all three.

Bring us the idea: a sketch on a napkin, a photo from a magazine, a fixture you love but can't justify. We engineer it, build it at the factory and send it to our warehouse. Same materials and craftsmanship, typically 30 to 60 percent below comparable designer retail.

No catalog, no inventory. Every fixture is made to order, starting from a single piece.

TWO WAYS TO WORK WITH US

Start from a sketch, *or from a photo.*

Your own design

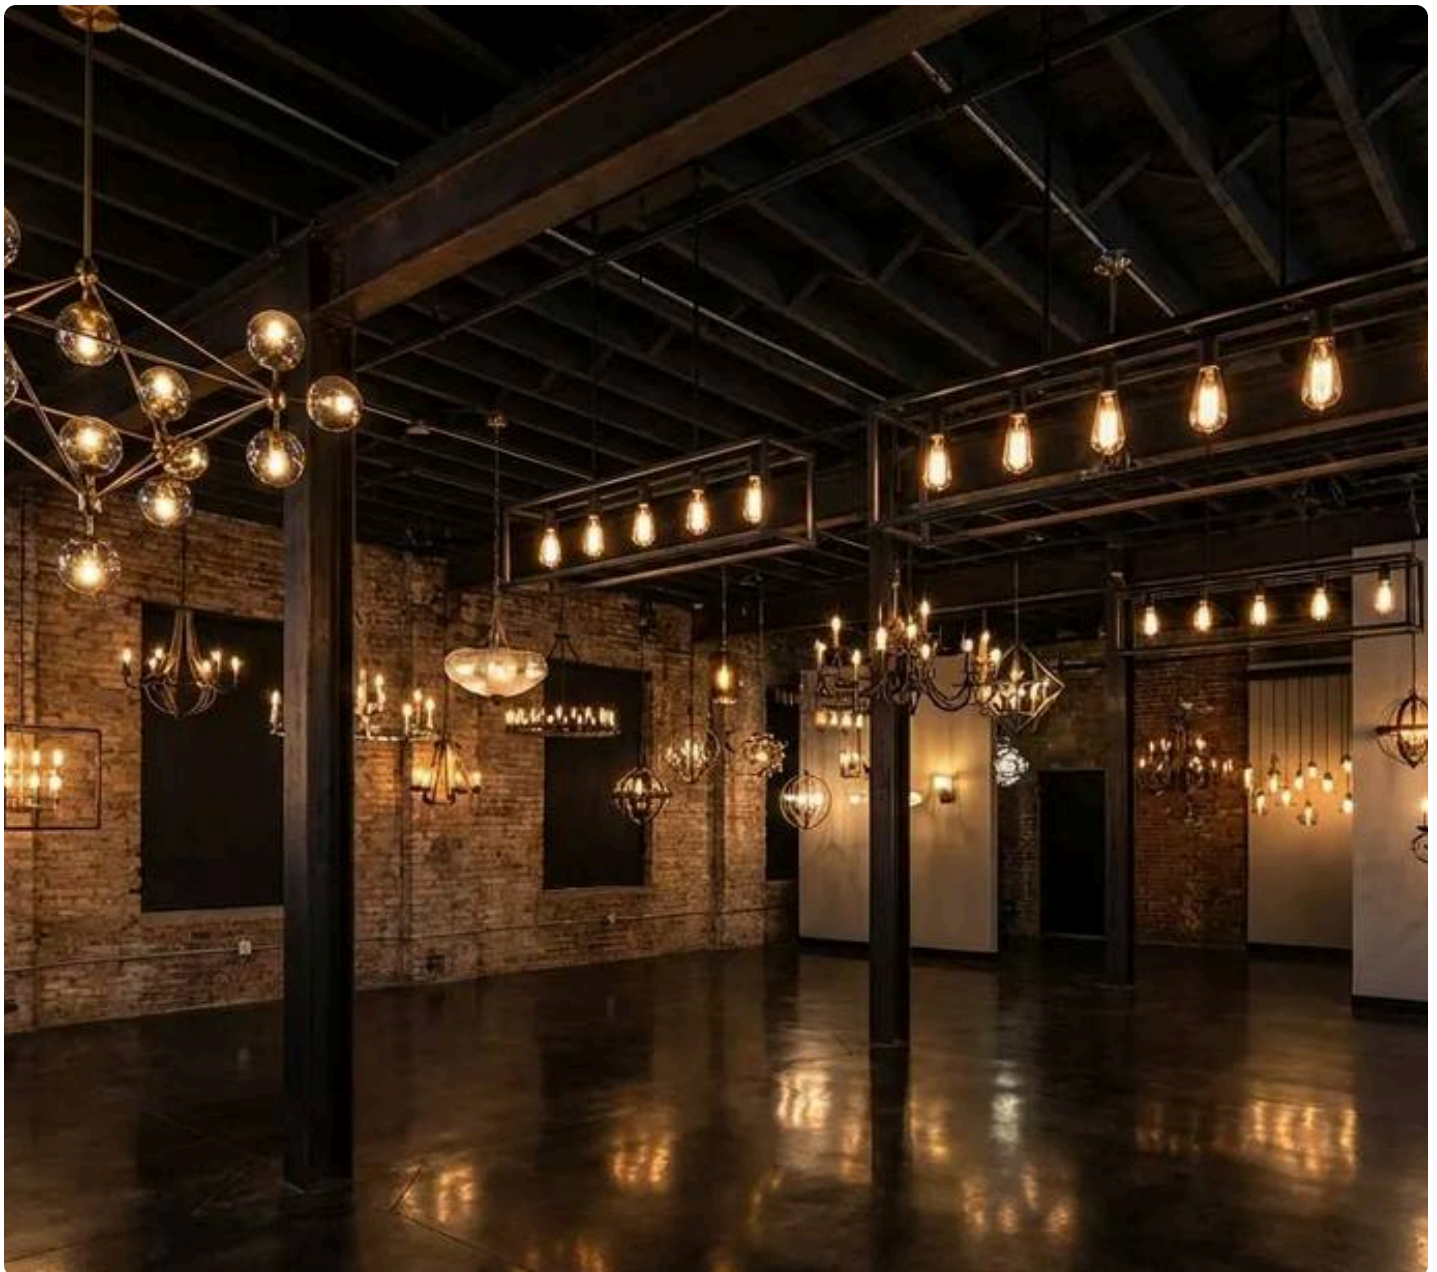

Sketch it on paper, a tablet or the back of a receipt. We work out the structure, choose materials and build a fixture that exists nowhere else.

GOOD FOR custom homes, boutique hotels, signature projects

Inspired by one you love

Send a photo of a fixture from a showroom, a hotel lobby or a magazine. We design a custom piece that captures what you like about it, in your materials and size.

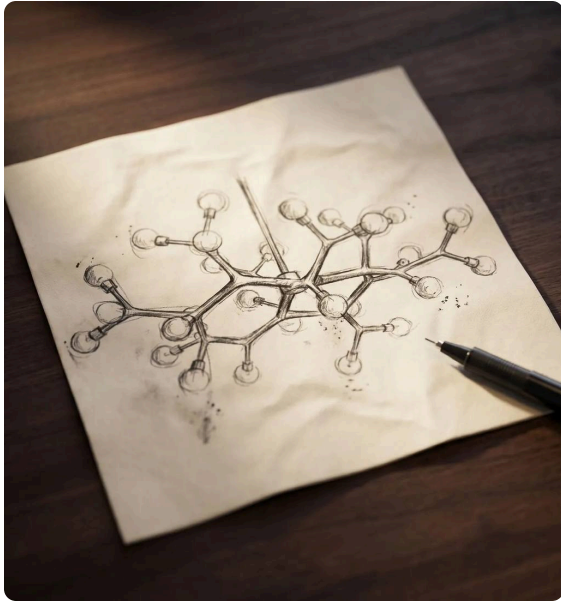

GOOD FOR builders who want the high-end look on a real budget

FROM SKETCH TO LIGHT

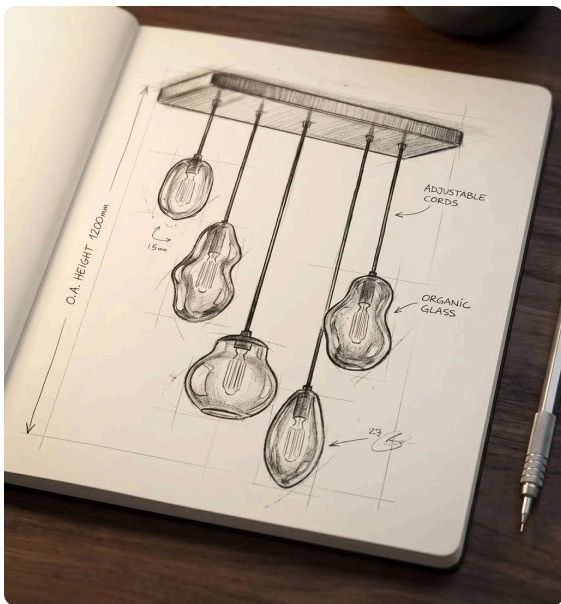

It starts *with a drawing.*

Each of these began as a rough sketch. We engineered the structure, sourced the materials and built the finished piece.

Molecular brass chandelier

Brushed brass, hand-blown glass globes

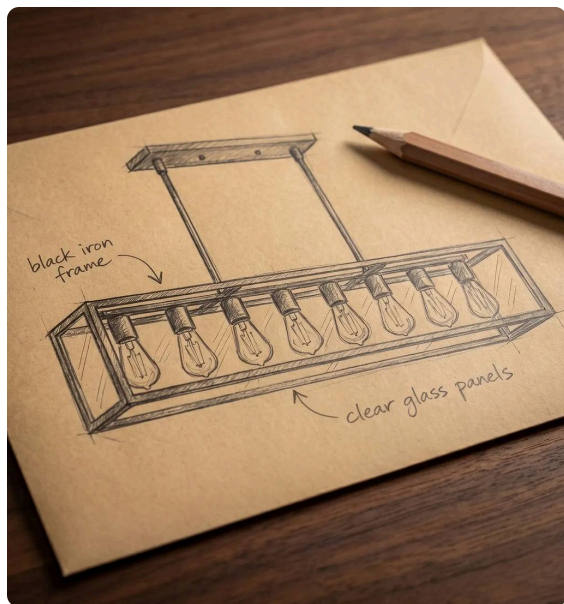

Organic glass pendant cluster

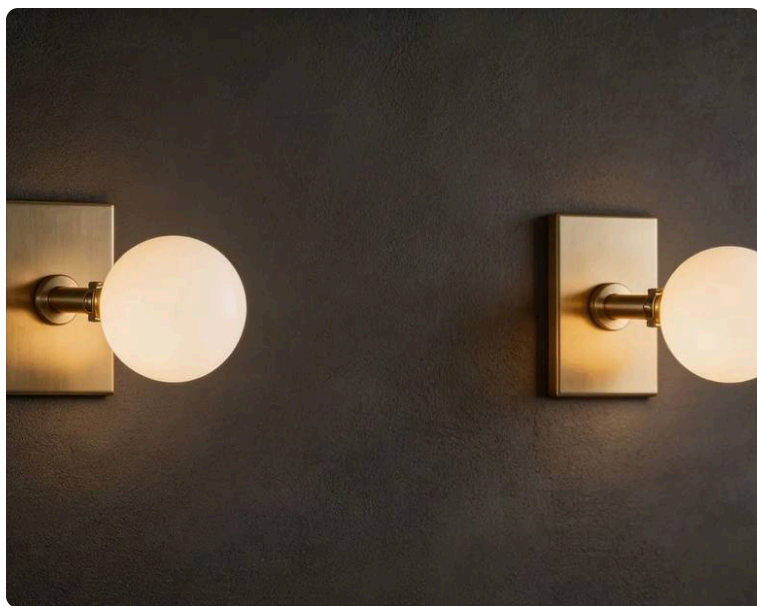

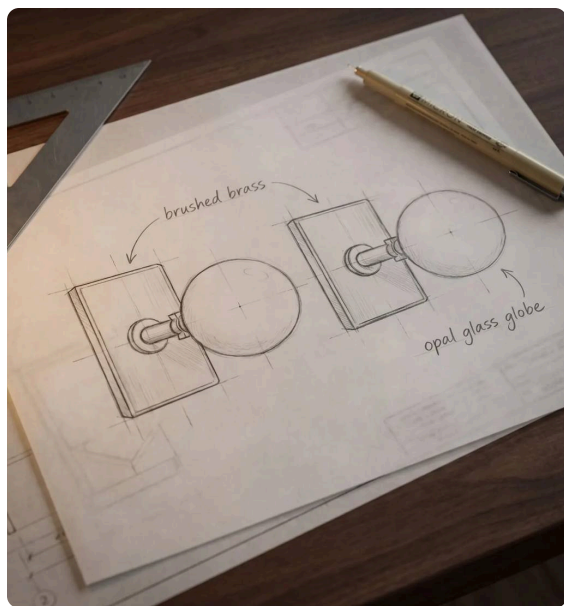

Matte black canopy, blown glass

FROM SKETCH TO LIGHT

Rough drawing, *finished fixture.*

**Industrial linear chandelier**

Black iron frame, clear glass, Edison bulbs

**Brass globe wall sconces**

Brushed brass, opal glass globes

If you can draw it, we can most likely build it.

INSTALLED

In finished *homes.*

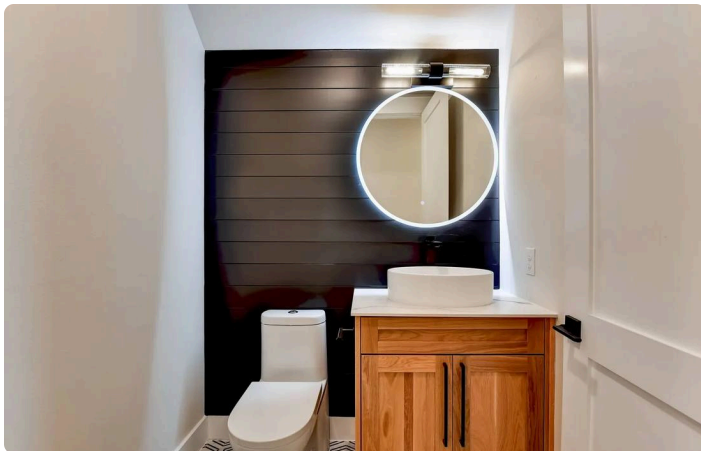

Chandeliers, pendants and sconces supplied by ARI, photographed on site.

HOW IT WORKS

From idea *to installation.*

You don't need technical drawings, just an idea.

- 01

Share your idea
A sketch, a photo, a magazine page or a description.
- 02

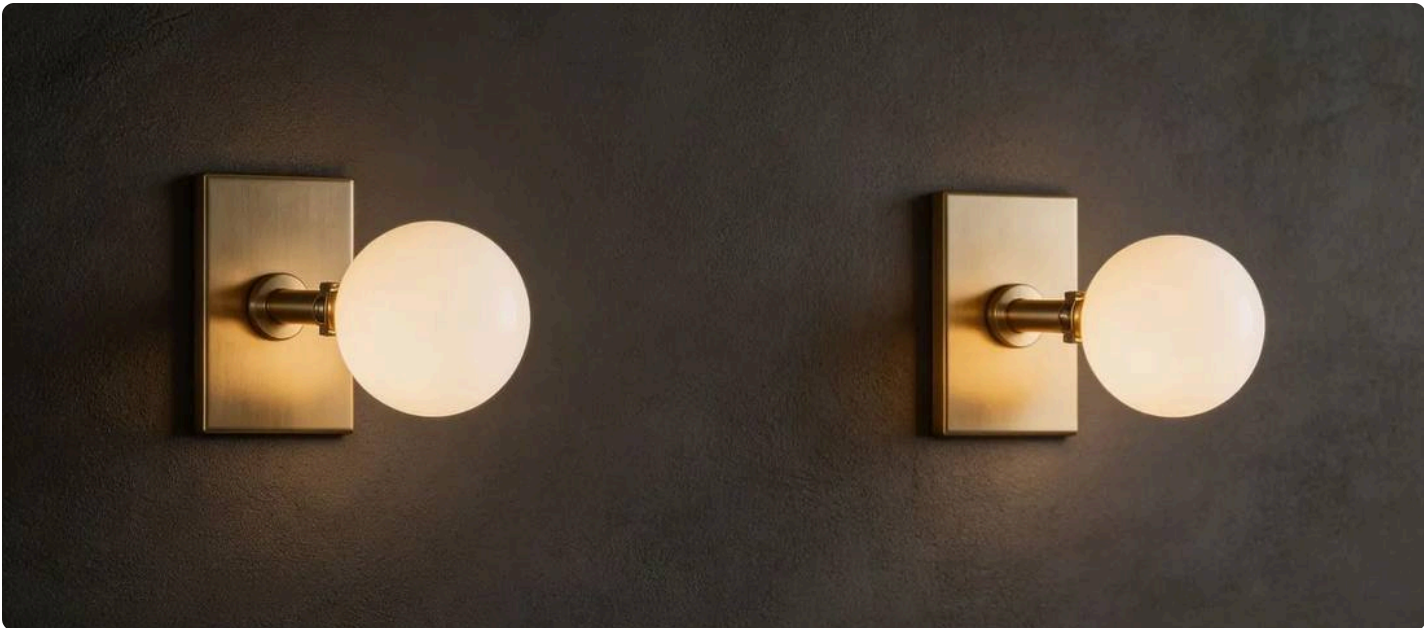

We engineer and quote
We choose materials and send a detailed quote with a rendering of the finished piece.
- 03

Approve and pay the deposit
Approval of the design and price starts production.
- 04

Built by hand
Typical lead time is 8 to 12 weeks, depending on complexity.
- 05

Pick up at our warehouse
Packed carefully and ready for your electrician.

FIXTURE TYPES	Chandeliers, pendants, linear, sconces
MATERIALS	Brass, iron, blackened steel
GLASS	Hand-blown, art glass, crystal
FINISHES	Custom plating and patinas
MINIMUM	One piece
WARRANTY	5-year fixture, 1-year electrical
