

HICKORY FLOORING

Wide-Plank Hickory. Character & Contrast.

Wide-plank engineered hickory with a eucalyptus plywood substrate. Hickory's signature high-contrast grain — light cream and dark walnut tones in the same plank — brings warmth and character to any room.

Same three grades, eight stain options, and three plank widths as our European oak. 7-coat UV-cured polyurethane finish, ready to walk on. 8–10 week delivery, 3,500 sq ft minimum.

SAVE 30–50% vs. comparable US & European manufactured products — same quality, direct from factory

KEY FEATURES

- Engineered hickory on eucalyptus plywood core
- Three grades: Select, Premium, Luxury
- Eight designer stains per species
- Wide planks: 7", 8", and 8.5" widths available
- 60–75" plank lengths
- 7-coat UV-cured polyurethane finish, click-lock install
